Description

Mercury 700 SCi Sterndrives - Mercury Racing has expanded the versatility of the popular 700 SCi sterndrive engine package with the availability of the all-new NXT6 Super Speed Master (SSM) drive.

The NXT6 SSM drive, designed for boats with natural bow lift using minimal trim, offers OEM boatbuilders and consumers the benefit of using the legendary dry-sump Six drive with the engine mounted in the same location as a Bravo drive set-up thanks to Mercury Racing's exclusive NXT¹® transmission design.

The compact size of the transmission enables builders to install the engine in the same location (fore and aft) as a standard Bravo in close couple applications.

The transmission design allows for use of a "driveline kit" for forward engine applications.

Like all Mercury Racing sterndrives, the 700 SCi comes equipped with the Mercury exclusive Propulsion Control Module (PCM) 07 microprocessor.

Combining the powerful engine management computer with a 3.3 Liter Lysholm screw-type supercharger, roller camshaft and sequential fuel injection results in impeccable idle quality, instant throttle response and unmatched performance throughout the 4800-5200 rpm rated engine operating range.

Features

Horse Power (hp)	700
------------------	-----

Engine Details

Engine Make	Mercury
Horse Power	700
